PROFESSIONAL SUMMARY

Computer and Communication Engineering student with a strong technical background in Cybersecurity, Networks, Embedded Systems, and Software Development. Adept at designing complex systems, from hardware-software robotic platforms and IoT smart homes to enterprise network architectures and full-stack web applications. Proven leader and problem solver with extensive experience in leading technical teams within student organizations. Seeking to leverage hands-on project experience in a challenging technical role within Cybersecurity or Network Engineering.

EDUCATION

Mansoura University, Faculty of Engineering / *Mansoura, Egypt*

Bachelor of Engineering in Computer and Communication (CCE)

Graduation: 2028 | GPA: 3.5

Focus: Cybersecurity & Network Engineering

KEY PROJECTS

- **Local Bank Management System (Team Project):** Designed and deployed a server-based banking application supporting core functions: secure account creation/deletion, transactions (deposits/withdrawals), and real-time balance inquiries.
- **Enterprise Corporate Network Design:** Engineered a scalable network infrastructure integrating redundant servers, core routers, switches, and client devices (PC, mobile). Focused on optimizing traffic and security.
- **IoT Smart Home Automation:** Developed an interactive smart home with keypad authentication, automatic lighting, intelligent garage door system with collision avoidance, and sensor-driven feedback.
- **Multi-functional Autonomous Robots:** Built adaptable robotics platforms combining RC control, precise line-following, and dynamic obstacle avoidance using Arduino Uno, Ultrasonic/IR sensors, motor drivers, and Bluetooth communication.
- **Embedded Robotic Arm & Circuit Design:** Designed and implemented embedded control systems for a robotic arm and a custom capacitor-based PCB power supply circuit.
- **Responsive Web Applications:** Developed interactive frontend solutions including a Pizza Restaurant, Clothing Store, Cafe, and a Personal Portfolio using HTML, CSS, and JavaScript.

TECHNICAL SKILLS

- **Networking & Security:** Network Design, Routing, Switching, Security Fundamentals.
- **Programming:** Python, Java, C, C++, HTML, CSS, JavaScript.
- **Hardware & Embedded:** Arduino, Microcontrollers, Circuit Design, PCB Design, Robotics Integration, Sensors.
- **Design Tools:** Graphic Design, Adobe Creative Suite.

EXPERIENCE

Graphic Designer | Review Elmahlla / *Elmahlla, Egypt*

2 Months | Implemented visual design strategies and marketing assets.

STUDENT LEADERSHIP & ACTIVITIES

- **CAT Reloaded:** Graphic Design Supervisor (Jan 2025 – Jan 2026). Promoted from Member within one year.
- **Starks MU:** Graphic Design Head & Hardware Track Supervisor (Sep 2025 – Jun 2026).
- **ICPC Mansoura:** Vice Media (Sep 2025 – Mar 2026).
- **Students for Egypt:** Graphic Designer.

TRAINING & COURSEWORK

- Cybersecurity Fundamentals Course
- Arduino & Robotics Programming Course
- Web Design Course

SOFT SKILLS & LANGUAGES

- **Soft Skills:** Teamwork, Problem Solving, Strategic Communication, Time Management.
- **Languages:** Arabic (Native), English (Intermediate).
